Practical for Loop Assignments

Question 1 - Kyeyune Ashiraf

Write a C program that:

- Uses a **for loop**
- Prints numbers from **1 to 10**

Expected output example:

1 2 3 4 5 6 7 8 9 10

Question 2 - Muhwezi Tyson

Write a program that:

- Prints **all even numbers between 1 and 20**

Example output:

2 4 6 8 10 12 14 16 18 20

Question 3 - Odong Jacob

Write a program that:

- Prints **all odd numbers from 1 to 15**

Question 4 - Nabulime Shivan

Write a program that:

- Calculates the **sum of numbers from 1 to 10**
- Displays the result.

Example:

Sum = 55

Question 5 - Lugwana Philip

Write a program that:

- Asks the user to enter a number **n**
- Calculates the **sum from 1 to n**

Example:

Input

Enter number: 5

Output

Sum = 15

Question 6 - Muyinda Joseph

Write a program that:

- Asks the user for a number
- Displays its **multiplication table from 1 to 10**

Example:

5 x 1 = 5

5 x 2 = 10

5 x 3 = 15

...

Question 7 - Nalwanga Desire

Write a program that:

- Counts how many numbers exist **between 1 and 50**

Output example:

Total numbers = 50

Question 8 - Atwongiire Jonas

Write a program that:

- Calculates the **factorial of a number**

Example:

Enter number: 5

Factorial = 120

(Hint: 5! = 5 × 4 × 3 × 2 × 1)

Question 9 - Kamuliso Samuel

Write a program that:

- Prints numbers **from 10 down to 1**

Output:

10 9 8 7 6 5 4 3 2 1

Question 10 - Okoi Tabica

Write a program that:

- Prints the **square of numbers from 1 to 10**

Example:

1^2 = 1

2^2 = 4

3^2 = 9

...

Question 11 - Tumwebaze Jordan

Write a program that:

- Finds the **sum of all even numbers between 1 and 20**

Question 12 – Okello Emma

Write a program that:

- Reads **5 numbers from the user**
- Calculates their **average**

Question 13 Ashaba Kenneth

Write a program that:

- Allows the user to enter **10 numbers**
- Finds the **largest number**

Question 14 – Ssegawa Tonny

Write a program that:

- Uses a **for loop to allow 5 attempts**
- Each time the user enters a number
- The program prints **"Try Again"**

Question 15 - Okello Stephen

Write a program that prints:

```
*
**
***
****
*****
```

(Hint: nested for loops)

Question 16 - Muzimba Ian

Write a program that prints:

*****

****

***

**

*

Question 17 - Mboija Allan

Write a program that prints:

1

12

123

1234

12345

Question 18 - Muyala Carol

Write a program that prints **all multiplication tables from 1 to 10**.

Example:

1 x 1 = 1

1 x 2 = 2

...

10 x 10 = 100

(Hint: nested loops)

Question 19 - Ssemwogerere Ukasha

Write a program that:

- Asks the user to enter a number
- Uses a **for loop** to check if the number is **prime**

Example:

Enter number: 7

7 is a prime number

Question 20 – Odoch Joel

Write a program that:

- Prints the first **10 Fibonacci numbers**

Example:

0 1 1 2 3 5 8 13 21 34

Question 21 – Nakaye Ann

Write a function greet() that prints:

Welcome to C Programming

Question 22 – Mwanje Trevor

Write a function add(int a, int b) that returns the sum of two numbers.
Call it from main() and display the result.

Question 23 – Behumisa Henry

Write a function getNumber() that returns **10**.
Display the returned value in main().

Question 24 – Opade Paul

Create a function multiply(int x, int y) that returns the product of two numbers.
Ask the user for input.

Question 25 – Okim Mark

Write a function square(int n) that returns the square of a number.
Test it with user input.

Question 26 – Mugalya Ronald

Write a function printEven(int n) that prints all even numbers from 1 to n.

Question 27 – Nabadda Salmah

Write a function printOdd(int n) that prints all odd numbers from 1 to n.

Question 28 – Kyaligamba Musa

Write a function factorial(int n) that returns the factorial of a number.

Question 29 – Wambi Benard

Write a function isPrime(int n) that returns 1 if the number is prime and 0 if not.

Question 30 – Shambe Latif

Write a function average(int a, int b, int c) that returns the average of three numbers.

Question31 – Muyanja Clever

Write a function largest(int a, int b, int c) that returns the largest number.

Question 32 – Kobugabe Bridget

Write a function reverseNumber(int n) that returns the reversed number.
Example: Input 123 → Output 321

Question 33 – Owori James

Write a function isPalindrome(int n) that returns 1 if a number is a palindrome, 0 otherwise.
Example: 121 → Palindrome

Question 34 – Ainembabazi Violah

Write a function printTable(int n) that prints the multiplication table of a number.

Question 35 – Rwotomiyo Maxwell

Write a function gcd(int a, int b) that returns the greatest common divisor of two numbers.

Question 36 – Namulindwa Angel

Write a function lcm(int a, int b) that returns the least common multiple of two numbers.

Question 37 – Atuhire Florence

Write a function sumArray(int arr[], int n) that returns the sum of all elements in an array.

Question 38 – Friday Isaac

Write a function maxArray(int arr[], int n) that returns the largest element in an array.

Question 39 – Among Eunice

Write a function countEven(int arr[], int n) that returns the number of even numbers in an array.

Question 40 – Itaagi Timothy

Write a function isSorted(int arr[], int n) that returns 1 if the array is sorted in ascending order, 0 otherwise.
